Lowering Emissions  
from Commercial Vehicles

# Transitioning to a Zero-Emission Delivery Fleet by 2025

Marcus Helliwell: Sustainability Developer IKEA

# Background

- 5000 truck deliveries a day
- 400 Delivery Vans
- 23 Stores
- 24 Hubs
- 4 Collection points
- 4 Distribution Centres
- 8 Transporters

# Driving Factors

- A better everyday life for the many people
- Good for the planet and for business
- Our responsibility

# Reaching Our Customers

- As more and more cities are moving towards a diesel ban, or serious diesel restrictions, we need act now to make sure we can still deliver goods to our customers tomorrow.

# Today's picture

Paneltex: IKEA Sheffield

E-fuso: London Hubs

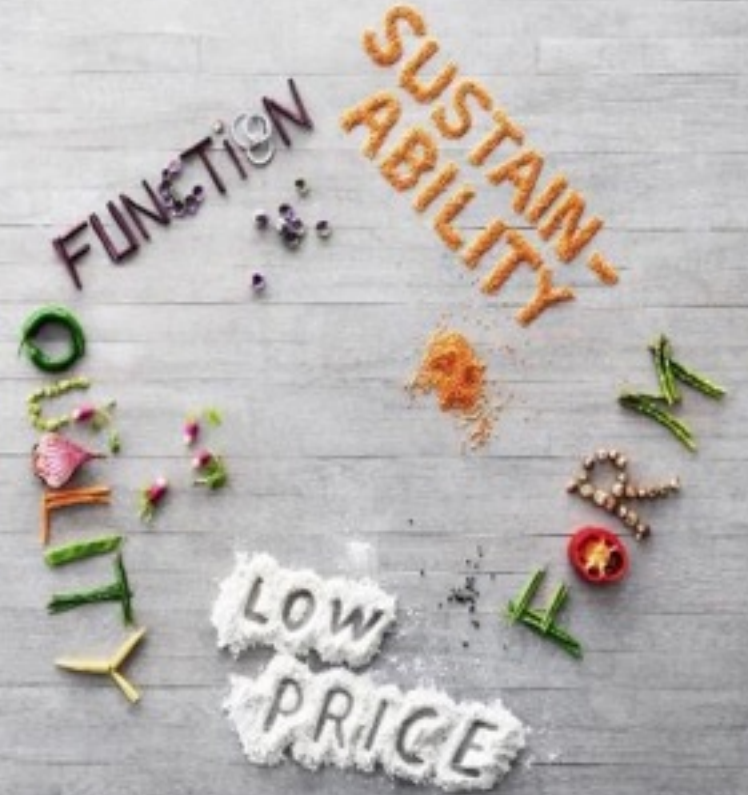

LDV: IKEA Exeter

# The Transition

- Staggered approach
- How do we approach the change?
- Challenges

# Wished Position

Year	London Market	Outside London Market
FY19	25%	10%
FY20	50%	25%
FY21	75%	35%
FY22	100%	50%
FY25	As Above	100%
